Green School Bali High School Profile

Mission: *A Community of Learners* ***Making our World Sustainable***

Green School Bali is an internationally recognized school in Bali, Indonesia, that combines academic rigor with experiential, interdisciplinary learning and a strong focus on sustainability. Its student-centered curriculum emphasizes agency, real-world problem solving, and global citizenship through community engagement and sustainability-focused projects. Learning takes place on a 100% carbon-neutral campus featuring open-air classrooms and innovative bamboo architecture. Green School Bali is accredited by the Western Association of Schools and Colleges (WASC) and recognized as an Indonesian Satuan Pendidikan Kerjasama (SPK). Its approach to sustainability education has received international recognition, reflecting the school's ongoing commitment to innovative education and regenerative leadership.

Curriculum:

Green School's academic year is divided into four terms, with students earning 27 credits per year, totaling 108 credits required for graduation across Grades 9 through 12. Our curriculum engages students with real-world sustainability challenges and prepares them for a rapidly changing world. Classes are offered at Foundations and Advanced levels, reflecting different levels of academic rigor and challenge. Students select courses based on requirements, interests, and abilities, with advisors guiding their selections. Multidisciplinary classes integrate various subjects, while debate and discourse develop analytical reasoning, critical thinking, and communication skills to create a well-rounded learning experience.

Green Stone Capstone:

All students in Grades 11 and 12 complete the Green Stone Project, a two-year capstone focused on addressing a real-world sustainability challenge. Students identify an issue, develop and implement a solution, manage their project, and engage with internal and external stakeholders. They rigorously defend their research, methods, and outcomes before sharing their learning and achievements through a TED-style community presentation. The project demonstrates students' capacity for inquiry, leadership, and meaningful action in creating solutions for human and more-than-human communities.

Additional Academic Highlights:

Syracuse University Project Advance (SUPA) Dual Enrollment: SUPA courses offered include Advanced Psychology, Forensic Science, Research Methods, and Personal Finance, allowing students to earn both high school and university credits.

University of the Arts London (UAL): Students have opportunities to engage with UAL through creative arts and design programming, gaining exposure to international perspectives, creative practice, and potential pathways in art and design.

Independent Study: Students can pursue personalized areas of interest beyond the standard curriculum, earning academic credit through self-directed learning and the creation of a learning artifact that meets established criteria.

Green School Bali High School Profile

Mission: A Community of Learners

Making our World Sustainable

Community Impact and Demographics:

Green School has over 500 students representing 50+ nationalities, with our Local Scholarship Program supporting 25+ talented Indonesian students each year. While still in school, students have collectively raised over \$5 million through nearly 270 Green Stone projects, participated in global forums such as the United Nations Conference of Parties and TED, and achieved notable academic and social milestones. Many of these achievements and ongoing initiatives can be found [here](#).

Grades and Class Rank:

Letter grades (A–F) are issued at the end of each marking period, though a small number of courses use a Pass/Non-Pass grading system. Green School does not compute class rank or weight GPAs. Students may be awarded an Honors Diploma upon successful completion of four advanced-level courses in Math, Humanities, Social Studies, or Science, along with one additional advanced course in a discipline of their choice.
